English, Hindi, Urdu

ABOUT ME

Full MERN Stack Developer with hands-on experience building *real world full stack* web applications using *React/NextJS, Tailwind CSS, Node.js, Express, and MongoDB*.

Recently, completed **GoGuide**, a *tourism platform* with booking, payment, Notification integrations, and cab with *Live Tracking* system features. Focused on building scalable backend systems (with Role based authentication and ADMIN Panel) and clean, responsive user interfaces also integrating third-party APIs. Passionate about learning, building real-world projects, and growing into a strong problem-solving developer.

PROJECTS

Full MERN Stack Project

GoGuide

Mar 2026 - May 2026

- Developed a backend system for a ride-hailing and tour booking platform
- Implemented driver & guide management with profile creation, verification
- Built REST APIs for authentication, booking flow, and user roles
- Designed scalable backend struct. with role-based (User/Guide/ADMIN) access control
- Worked on real-time-ready architecture for location tracking and ride flow
- Developed frontend admin panel & dashboards using React and Tailwind CSS
- **Live Project: (Click here)**

E-Commerce Web Application

Nov 2024 - Jan 2025

- Built and deployed a full-stack e-commerce web application using MongoDB, Express, React, and Node.js
- Implemented user authentication, product listing, cart functionality, and order flow
- Integrated backend APIs and managed database operations
- Designed fully responsive UI using Tailwind CSS
- **Live Project: (Click here)**

Frontend Development

Charitify

Sep 2025

- Built a crowdfunding platform to showcase causes and collect support requests
- Designed frontend pages and backend structure for campaigns and user submissions
- Currently improving features and exploring payment integration
- **Live Project: (Click here)**
